# Toll Tax

## BRIEF OVERVIEW

Vehicles are moving from place to another through toll roads. The software consists of two parts where in User can make vehicle "PASS" and user can also adjust duration to allow car to pass through the toll based upon amount received.

Admin can view amount, add users, add vehicle , add employee and he can also delete as required thus managing toll tax system.

## HARDWARE REQUIREMENT

i3 Processor Based Computer or higher

Memory: 2 GB RAM

Hard Drive Free Space: 1 GB

## SOFTWARE REQUIREMENT
