Coaching Management Website

BRIEF OVERVIEW

The project is about dividing work between Admin, Teacher and Students. All the 3 categories have been assigned with specific authorities. Admin has rights to add teachers and students. Teachers have the right to view all students, interact with them and also to overview students fees. Students have the right to send queries to teachers and upon receiving reply, students can view them accordingly.

HARDWARE REQUIREMENT

i3 Processor Based Computer or higher

Memory: 2 GB RAM

Hard Drive Free Space: 1 GB

SOFTWARE REQUIREMENT

OS: Windows 7 or higher

IDE: Eclipse / Photon

Database: Oracle 10 G

Server: Apache TomCat

Coaching Management Website

Project Development / Implementation Technology

The software is developed with Front End of HTML / Javascript and

Backend is developed using Java and Servlet

 Please download and install above all softwares. Thereafter set the path of JDK as default and attach Tomcat Apache with Eclipse . Now using Oracle 10 G prepare tables for database. (We will provide with relevant instructions upon sale of this software.)
